Don't lose any more nights of sleep. Invest in comfort and health with our Technological Mattress

with Graphene. Take advantage of our exclusive offers now!

KNOW MORE

# BELGIAN LATEX

Latex comes from rubber trees and petroleum.  
Combining elasticity with durability.

IT IS A RUBBER with a process of  
foaming that increases softness while  
maintaining durability characteristics  
against the canoe effect.

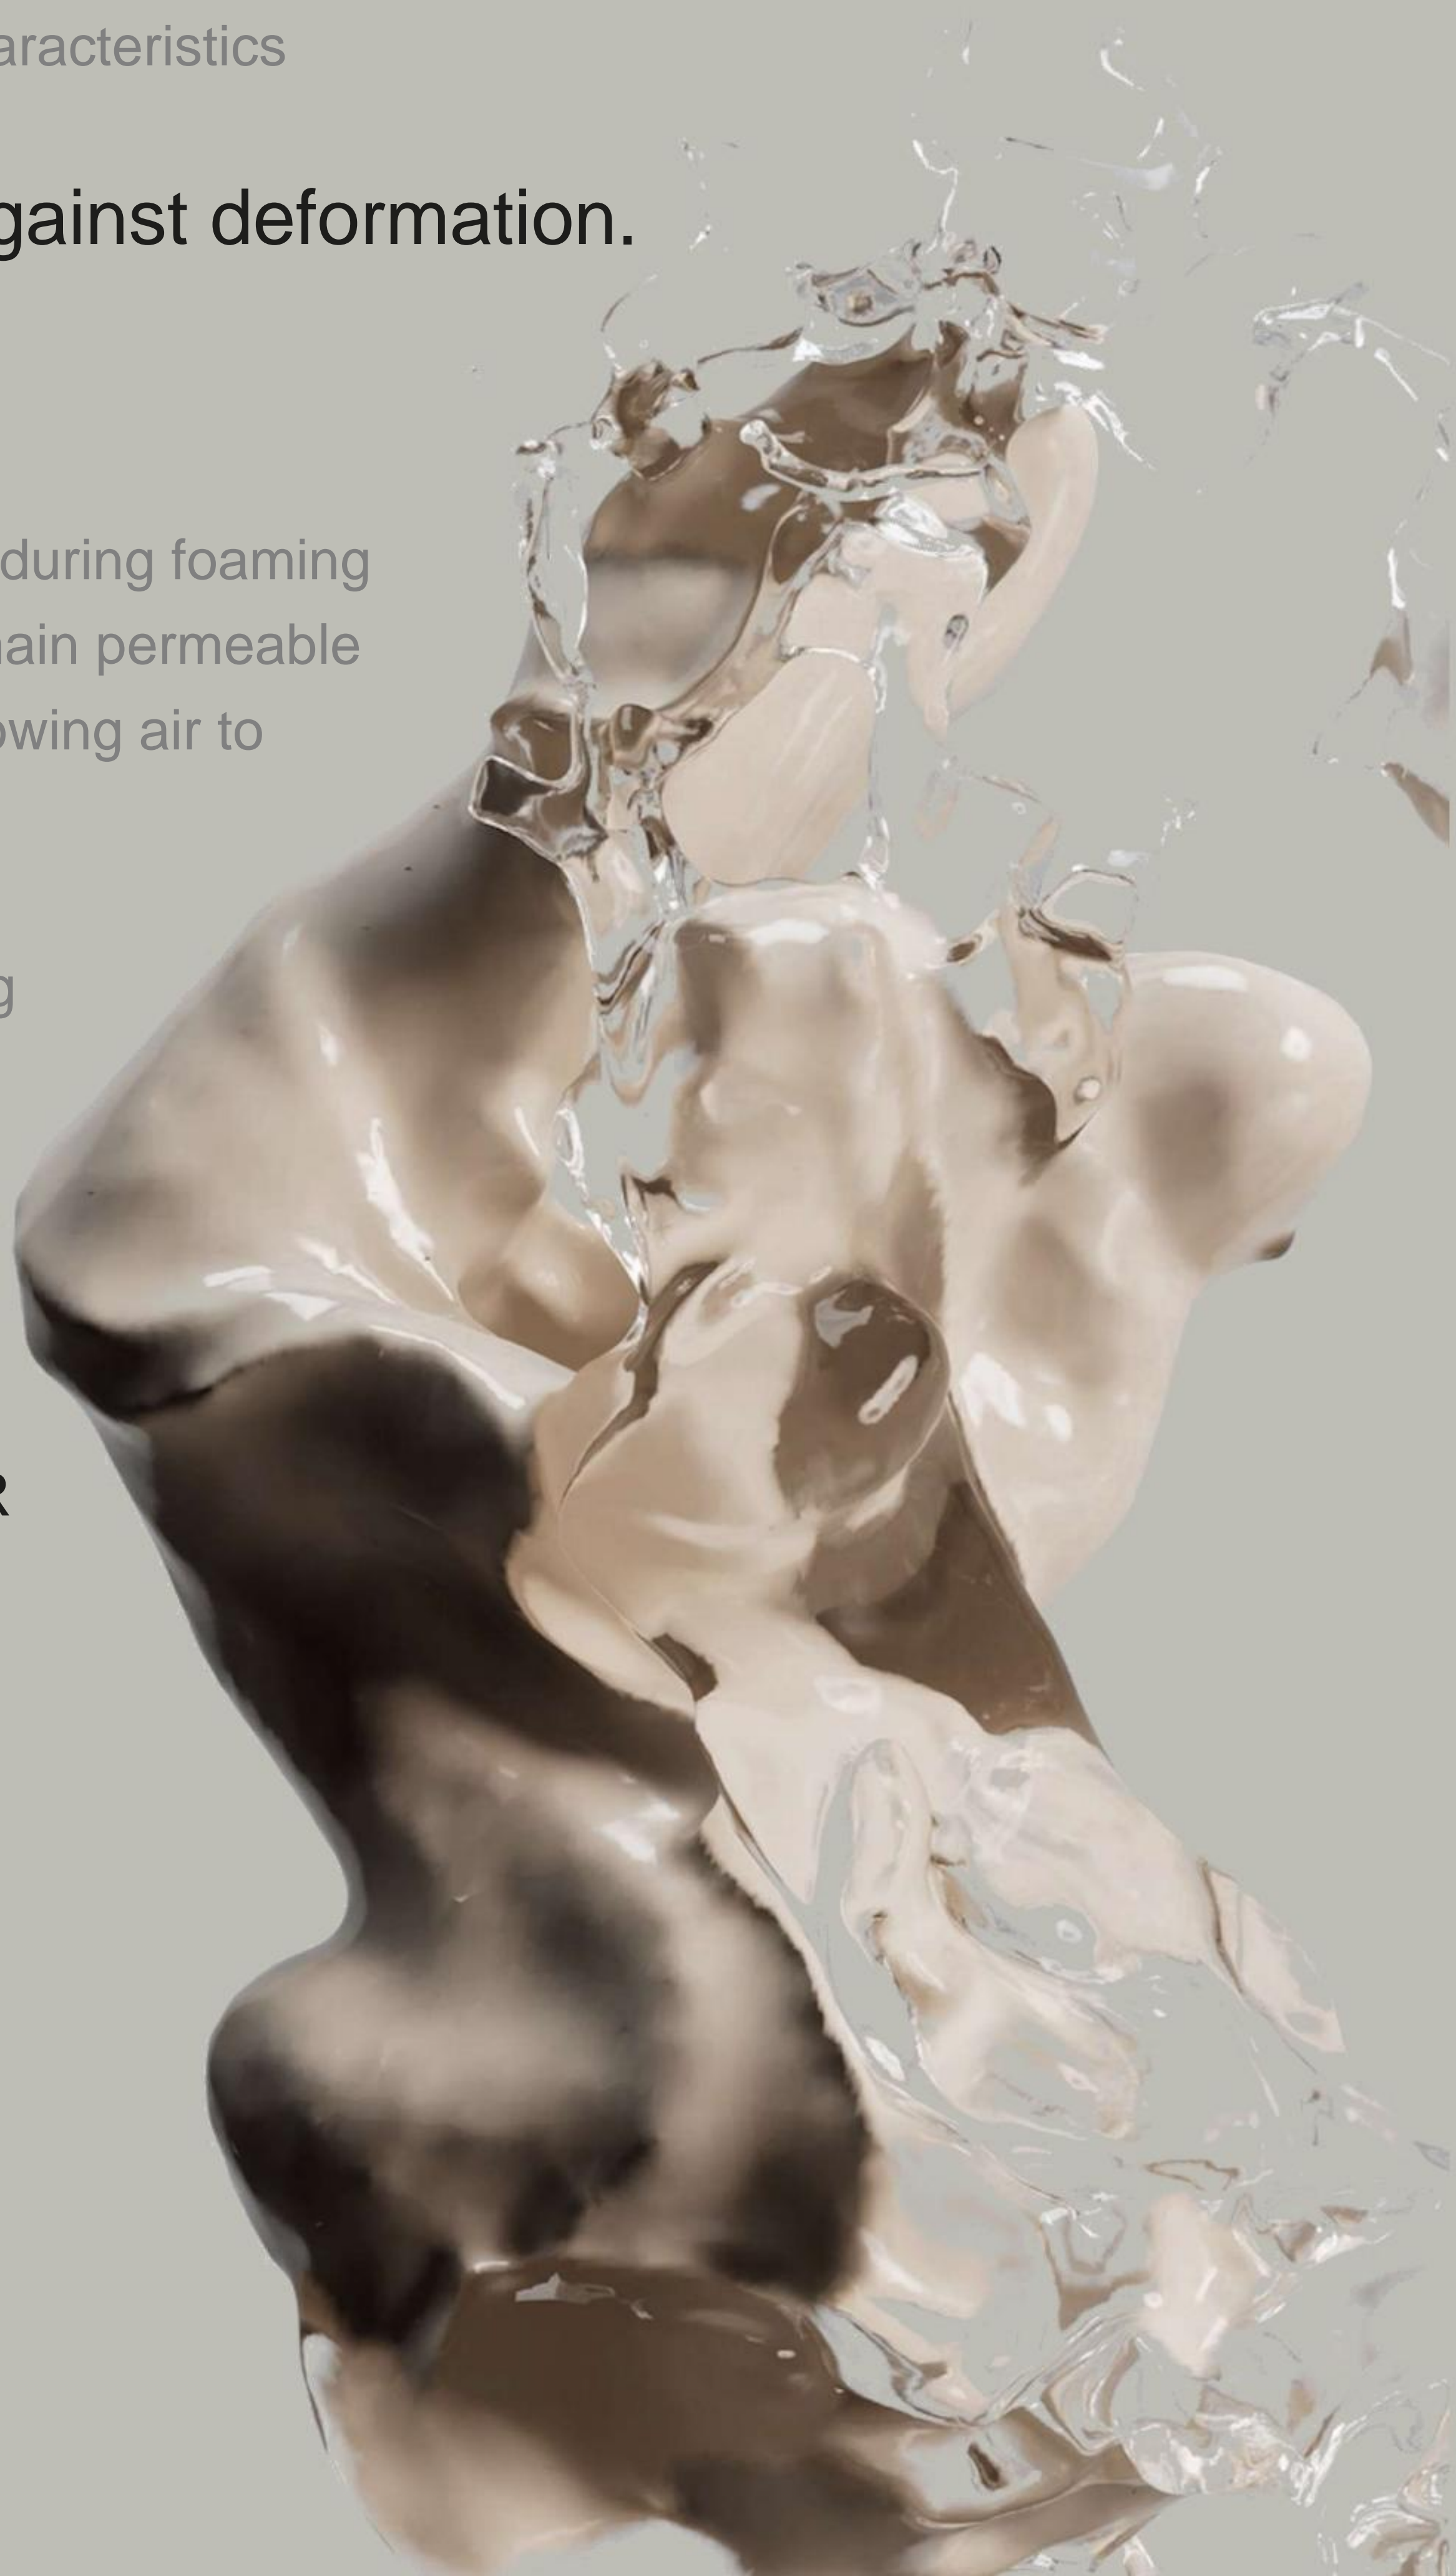

**Lasts 3X longer against deformation.**

## HYPOALLERGENIC

Its open cells generated during foaming  
are air vacuoles that remain permeable  
throughout the latex. Allowing air to  
pass freely. Like this,

in addition to not allowing  
organisms to attach  
themselves to the  
material, it also  
increases heat  
exchange with an effect

**THERMOREGULATOR**  
Natural.
